

Refurbishment works update November 2024

Old Barnsbury Transformation

Old Barnsbury kitchen and bathroom refurbishment works update

We hope you all had a nice autumn and are looking forward to the festive season.

As you may remember from our last update, we discussed the planned kitchen and bathroom refurbishment at Fisher House. Since then the team has worked diligently on this and we are now pleased to announce that the works at Fisher House will commence in the new year. These improvements aim to enhance your living spaces and increase comfort.

What will be upgraded?

The refurbishment will include modernisation of kitchen cabinets, worktops and bathrooms, including new sanitary ware.

- **Kitchen and bathroom improvements**

The option to combine the separate toilet with the bathroom to create a more spacious layout. Please note that in a few flats this may not be possible. If this is the case, it will be discussed with residents.

- **New entrance doors**

Solid core doors will be installed at individual flat entrances.

- **Other essential works**

Drainage improvement works which have already started.

Upcoming events

- We hope to hold a 'Meet the contractor' event at the community centre in December. Fisher House residents will be invited there to see some samples and make choices. A date and time for this will follow shortly.
- A series of workshops will also be held in early 2025 to discuss and show some of the planned landscape improvements.

We'll keep updating you and answering your questions.
